

Workshop: High-performance computing for economists

Lars Vilhuber¹ John M. Abowd¹ Richard Mansfield¹
Kevin L. McKinney

¹Cornell University, Economics Department,

August 20-22, 2013: Day 2

Subversion vs. Git

Checking out a subdirectory

SVN

```
1  svn co ${URL}/sub/directory (name)
```

GIT

```
1  mkdir <repo> && cd <repo>
2  git init
3  git remote add -f <name> <url>
4  git config core.sparsecheckout true
5  echo some/dir/ >> .git/info/sparse-checkout
6  echo another/sub/tree >>
  .git/info/sparse-checkout
7  git pull <remote> <branch>
```
