# Workshop: High-performance computing for economists

Lars Vilhuber[1]    John M. Abowd[1]    Richard Mansfield[1]
Kevin L. McKinney

[1]Cornell University, Economics Department,

August 20-22, 2013: Day 2

## Checking out a subdirectory

### SVN

```
svn co ${URL}/sub/directory (name)
```

### GIT

```
mkdir <repo> && cd <repo>
git init
git remote add -f <name> <url>
git config core.sparsecheckout \
 true
echo some/dir/ >> .git/info/sparse-checkout
echo another/sub/tree >> \
 .git/info/sparse-checkout
git pull <remote> <branch>
```
